April 15 – Summer 2024

Workdays and Times:

- Daywork, Mon – Fri
7 a.m. – 5 p.m.
- Nightwork, Mon – Fri
9 p.m. – 5 a.m.
- Saturday, 9 a.m. – 4 p.m.

**Dates and times are subject to change due to operational factors or inclement weather.*

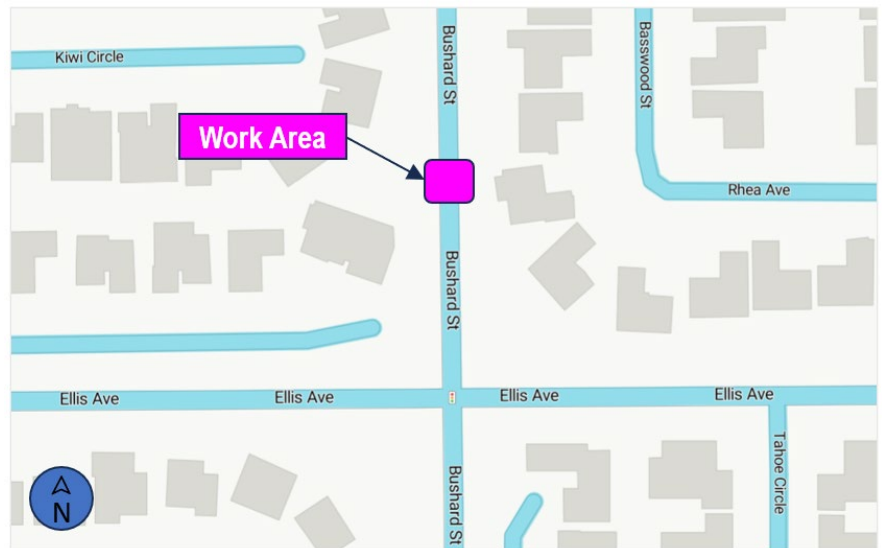

About Us

Orange County Sanitation District (OC San) is a public agency that provides regional wastewater collection, treatment, and recycling services for approximately 2.6 million people in central and northwest Orange County and treats more than 180 million gallons of wastewater each day.

Project Information

Ongoing maintenance of our facilities, structures, and pipelines is necessary to provide continuous wastewater service to our residents. Upcoming maintenance is scheduled at an underground diversion structure along Bushard Street just north of Ellis Avenue. This project will repair valves, concrete surfaces, and associated instrumentation and electrical components within OC San's Bushard Diversion Structure in the City of Fountain Valley. This structure helps to transport wastewater to OC San's two treatment plants.

Project Map

Work Hours

Depending on the construction activity, work hours will vary between daytime, nighttime, and some Saturday work.

Critical portions of the project will need to be done at night between the hours of 9 p.m. – 5 a.m. due to lower sewer flows.

10844 Ellis Avenue
Fountain Valley, CA 92708

What to Expect

As construction work occurs, it will be necessary to make modifications to traffic lanes. For your safety and that of our crews, please follow all posted signs.

- Various work hours: daytime, nighttime, weekend
- Lane closures
- Occasional turn restrictions
- Construction noise
- Potential odors when opening up manhole covers

Crews will make every effort to minimize impact to the community. We apologize in advance for the inconvenience.

Please sign up for email notifications or text alerts to keep informed of the schedule.

Construction Timeline

Starting April 15 – Summer 2024

About the Bushard Diversion Structure

Several manhole covers are noticeable in the roadway surface on Bushard Street. These manholes provide access to a below grade large concrete structure, the Bushard Diversion Structure. This structure is critical to the conveyance of wastewater and is responsible for diverting wastewater flows through 8-ft diameter sewer pipelines to either the Fountain Valley or Huntington Beach facility for treatment.
