

Temporary Night Construction Work

We've been making steady progress on improvements to the regional sewer system in the City of Cypress, and work is now moving back into the City of Los Alamitos. As part of this effort, crews will be performing temporary night work to clean the sewer pipeline when sewer flow is lower and it is safer to do so. The activity will generate minimal noise.

- **Location:** Starting at Bloomfield St and Cerritos Ave., and moving east towards Oak St. and Catalina St. (shown on map moving right to left)
- **When:** Starting, Sun. February 22 and lasting for approx. one week.*
- **Work Hours:** 8 p.m. - 6 a.m.*
- **Impacts:**
 - Reduced traffic lanes
 - Temporary traffic control while work is being performed
 - Increased activity and lights
 - Please follow all posted signs for traffic or parking impacts

**All dates and times are subject to change due to operational factors or inclement weather.*

We appreciate your patience as we complete this important maintenance to ensure the continued reliability of the regional sewer system.

Stay ahead of the crews and cones by signing up for text alerts and email notifications.

Project Description:

The regional sewer line in the cities of Cypress, Los Alamitos, and La Palma is approximately 50 years old and in need of upgrades. The Cypress Trunk Sewer Project will focus on enhancing about 7 miles of sewer, replacing portions of the pipe with larger diameter pipe to increase the capacity, or rehabilitating other segments of pipe to extend the life of the sewer system. Approximately 100 manholes will also be replaced and/or rehabilitated. These repairs will extend the life of the sewer pipes by another 50 years.

The Orange County Sanitation District (OC San) is a public agency that provides regional wastewater collection, treatment, and recycling services for approximately 2.6 million people in central and northwest Orange County. OC San operates two facilities, 15 pump stations, almost 400 miles of regional sewer pipes, and treats more than 190 million gallons of wastewater each day.
